

HIP EXERCISE

LEVEL 6 - POWERFUL STANDING LEG LIFTS

@M_Pazzinatto
@DrDanilo_Silva
@TREK_group

INSTRUCTIONS

- Start in standing at a weight you can do 12x without compromising technique
- Don't lean or incline the trunk
- Hold some support to increase stability
- **Move one leg up in line with body, then move it down AS FAST AS YOU CAN (less than 1 second)**
- Keep the other leg straight and stable by tightening bottom muscles
- Complete on left and right sides

Sets: 3 each side

Repetitions: 12

Rest for: 60 seconds
between sets

5 TIPS TO MONITOR YOUR KNEE CAP PAIN DURING EXERCISE

Use this scale to guide acceptable pain levels

0 No Pain
2
5
10 Worst Pain Possible

- 1 Ideally keep pain < 2/10 during your activities if possible
- 2 Do not exceed 5/10 pain during exercise
- 3 Pain should return to normal levels 60 minutes post-exercise
- 4 Pain should not be increased the following morning post-exercise
- 5 Do your physical activities based on your pain response

These numbers will help you as a guide, however, it may vary from person to person.
